

# Homework Assignment

**Part One: Read the two articles and consider the questions presented.  
(15-20 minutes)**

## **9 Elephants in the Classroom**

**Read the article by Will Richardson.**

1. We know that most of our students will forget most of the content that they “learn” in school.
2. We know that most of our students are bored and disengaged in school.
3. We know that deep, lasting learning requires conditions that schools and classrooms simply were not built for.
4. We know that we’re not assessing many of the things that really matter for future success.
5. We know that grades, not learning, are the outcomes that students and parents are most interested in.
6. We know that curriculum is just a guess.
7. We know that separating learning into discrete subjects and time blocks is not the best way to prepare kids for the real world.
8. We know (I think) that the system of education as currently constructed is not adequately preparing kids for what follows if and when they graduate.
9. And finally, we know that learning that sticks is usually learned informally, that explicit knowledge accounts for very little of our success in most professions.

**Be ready to respond to these questions in discussion with your table team at the Vision Retreat.**

We can acknowledge the gaps between what we know to be true about learning and what we do in our classrooms, and be willing to at the very least engage in conversations aimed at bridging those gaps for the sake of our kids.

<b><u>Questions</u></b>	<b><u>Responses</u></b>
Which of the 9 elephants intrigue you?	
What other elephants would you add?	
Are you doing anything about any of these elephants?	
Should any of the elephants be part of our future vision?	

# 10 Principles of Modern Learning

By Will Richardson and Bruce Dixon

## Read the article by Will Richardson.

1. Have clearly articulated and shared beliefs about learning that are lived in every classroom.
2. Live a mission and a vision deeply informed by new contexts for learning.
3. Have cultures where personal, self-determined learning is at the center of student and teacher work.
4. See curriculum as something that is co-constructed to meet the needs and interests of the child.
5. Embrace and emphasize real-world application and presentation to real audiences as assessment for learning.
6. See transparency and sharing as fundamental to a powerful learning environment.
7. Use technology first and foremost as an amplifier for learning, creating, making, connecting, communicating, collaborating, and problem solving.
8. Develop and communicate in powerful ways new stories of learning, teaching, and modern contexts for schooling.
9. Encourage community wide participation in the equitable, effective education of children.
10. Embrace and anticipate constant change and evolution.

## Be ready to respond to these questions in discussion with your table team at the Vision Retreat.

<u>Questions</u>	<u>Responses</u>
Do you embrace any of these principles in your vision?	
What principles would you add?	

**Part Two: An electronic investigation assignment**

The second part of your homework is to spend 20 minutes investigating how another school or district has reimagined itself. Everyone at your table for the Vision Retreat will investigate the same site and as a team you will discuss and present a list of ideas you think might be great to consider as we reimagine District 105.

<b>Table Assignment</b>	<b>Investigation Site</b>
<b>Table 1</b>	<b>Stonefields School, New Zealand (Visible Learning)</b>
<b>Table 2</b>	<b>Green Dot Public Schools</b>
<b>Table 3</b>	<b>XQ The Super School Project: High Schools that Matter</b>
<b>Table 4</b>	<b>New Tech Network</b>
<b>Table 5</b>	<b>ALT Schools</b>
<b>Table 6</b>	<b>Redefining Ready</b>

**Please use the notes template below to record what you found in your investigation that answers the investigation questions:**

**Note: You may not find the answers to all questions. Find answers to as many of the questions as possible.**

# Investigation Questions

<b>Questions</b>	<b>Reimagining Ideas/Concepts/Hopes/Aspirations</b>
<p style="text-align: center;">Beliefs</p> <ol style="list-style-type: none"> <li>1. How were students learning most powerfully and deeply?</li> <li>2. What were adult commitments to students and their well-being?</li> <li>3. What were adult commitments to each other?</li> <li>4. What were student commitments to each other?</li> <li>5. What were mission, vision and values?</li> </ol>	
<p style="text-align: center;">Context</p> <ol style="list-style-type: none"> <li>1. What were the large, global skills aimed at college, career, or life readiness?</li> <li>2. What skills, knowledge, and competencies guided students learning for the future?</li> <li>3. How well did adults understand each student's learning needs?</li> </ol>	
<p style="text-align: center;">Practices</p> <ol style="list-style-type: none"> <li>1. What was the role of a student?</li> <li>2. What was the role of the teacher?</li> <li>3. How did learning extend beyond the classroom walls?</li> <li>4. What did engagement look like?</li> <li>5. What principles or policies were non-negotiable?</li> </ol>	
<p style="text-align: center;">Culture of Learning</p> <ol style="list-style-type: none"> <li>1. How was adult learning supported?</li> <li>2. How was student learning supported?</li> <li>3. Was there common language, expectations?</li> <li>4. How did they address the emotional aspects of change?</li> <li>5. Was there accountability?</li> </ol>	

## **Table 1: Stonefields School, New Zealand (Visible Learning)**

The Elementary School's K-8 learning philosophy rests on the four key vision principles - Building Learning Capacity, Collaborating, Making Meaning and Break Through. This elementary school sets the foundation for readying students for middle and high school. It is a great source for districts interested in K-12 articulation. The focus on developing learners' capacity to thrive in tricky situations - knowing what to do when they don't know what to do - is valued highly. Teachers explicitly teach learners strategies to get out of 'I'm stuck' situations. Being stuck is celebrated and harnessed as an opportunity to build each individual's learning capacity.

## **Table 2: Green Dot Public Schools**

Green Dot high schools work to ensure that those students who most need access to excellent teachers are consistently taught by the best in the profession. In Green Dot schools, where students typically enter in the lowest 10% of academic proficiency, advancing a student a single grade level per year isn't enough to ensure timely graduation. Therefore, we define high-quality teaching as the ability to accelerate student learning and close the achievement gap between students in low-income communities and their more affluent peers. In placing high-quality instruction at the heart of our model, we are committed to recruiting, training, and supporting the very best teachers to professional excellence. Green Dot is a charter school that is developed within a public school system and with the collaboration and support of unions.

### **Table 3: XQ The Super School Project: High Schools that Matter**

We began with XQ: The Super School Project, a competition inviting America to reimagine high school. People across the country self-assembled into teams and started a movement to transform high school education in their areas. We started XQ because we believe our nation's young people cannot wait any longer for our educational system to change. America's public high school system was founded to ensure that all high school students have access to a free, high-quality education that prepares them for college, career and life.

## **Table 4: New Tech Network**

New Tech Network is a partner for school change. Schools can inspire and engage all students. Teachers can offer relevant and authentic learning experiences in all subjects. Students can develop skills essential for both college and career, in addition to mastering academics. As a leading design partner for comprehensive school change, New Tech Network has proven public schools can accomplish all of these aspirations. We do not operate schools; instead, we work with districts and communities throughout the country to transform schools into innovative learning environments. At New Tech Network, our partnerships with schools drive everything we do. Together we are transforming teaching and learning around the country. Our shared vision for student success – college and career readiness for all students – has a very specific meaning in the Network. What we mean is that every graduate of a New Tech school leaves aware, eligible and prepared to pursue postsecondary education or training.

Since 2010, we have nearly quadrupled the number of schools with graduating classes in diverse socio-economic demographics. We are proud of our high 4-year high school graduation, college enrollment, and college persistence rates.

## **ALT Schools:**

ALTSchools have been building a K-8 laboratory and technology-enabled network to empower and connect families, students, and teachers. The network has expanded across San Francisco, Palo Alto and New York City. In partnership with educators, a technology and design team has created a platform to personal learning and streamline school operations. Schools range in size from 30 to 100 students and offer mixed-aged learning environments focused on project-based learning experiences focused on developing the whole child.

## **Table Six: Redefining Ready**

America's high schools have a profound responsibility to ensure that our nation's 14 million high school students are college ready, career ready and life ready. ***Redefining Ready!*** is a national initiative launched by the AASA (The School Superintendents Association) to introduce new research-based metrics to more appropriately assess that students are college ready, career ready and life ready. The initiative is a response to dismal college and career readiness scores reported by standardized test makers that fail to portray a comprehensive picture of student potential. Our nation's high schools provide students with rigorous academic programs, personalized and career-specific learning experiences, along with social and emotional skills that prepare them to be global citizens in an ever-changing world
