**Kenneth Oppel**

Gurrie Middle School delighted to welcome author Kenneth Oppel for a virtual event on Thursday, April 15<sup>th</sup>. Mr. Oppel will talk with students about his career as an author and discuss his books.

To guarantee a personalized signed copy (bookplate) of any of these books, please return this order form with payment (cash or check payable to Gurrie Middle School) or place your order online using the link provided below by Friday, March 19<sup>th</sup>. Books will be available at the school after Spring Break.

\_\_\_\_\_ *Hatch (The Overthrow #2)*, (Hardcover) ~~\$17.99~~ \$14.39

Fans left desperate for more at the end of *Bloom* will dive into this second book of the Overthrow trilogy--where the danger mounts and alien creatures begin to *hatch*.

First the rain brought seeds. Seeds that grew into alien plants that burrowed and strangled and *fed*.

Seth, Anaya, and Petra are strangely immune to the plants' toxins and found a way to combat them. But just as they have their first success, the rain begins again. This rain brings eggs. That hatch into insects. Not small insects. Bird-sized mosquitos that carry disease. Borer worms that can eat through the foundation of a house. Boat-sized water striders that carry away their prey.

But our heroes aren't able to help this time--they've been locked away in a government lab with other kids who are also immune. What is their secret? Could they be...part alien themselves? Whose side are they on?

\_\_\_\_\_ *Bloom*, (Hardcover) ~~\$16.99~~ \$13.59

The invasion begins--but not as you'd expect. It begins with rain. Rain that carries seeds. Seeds that sprout--overnight, everywhere. These new plants take over crop fields, twine up houses, and burrow below streets. They bloom--and release toxic pollens. They bloom--and form Venus flytrap-like pods that swallow animals and people. They bloom--everywhere, unstoppable.

Or are they? Three kids on a remote island seem immune to the toxic plants. Anaya, Petra, Seth. They each have strange allergies--and yet *not* to these plants. What's their secret? Can they somehow be the key to beating back this invasion? They'd better figure it out fast, because it's starting to rain again....
