

8th Grade Math Program Overview

The primary math focus for eighth grade students is to interpret and analyze linear functions and use graphs, tables, and symbols to solve problems.

Instructional Materials

Beginning in the 2007-2008 school year, eighth grade students will work with the newly adopted *McDougal-Littell Math* series. Eighth grade will supplement the McDougal-Littell program with four Connected Math units: Moving Straight Ahead, Looking for Pythagoras, Say It With Symbols, and Thinking with Math Models.
